

For Immediate Release

Oeuf launches its new Rhea cot

Brooklyn, NY – January 2013 – Oeuf

Oeuf is adding the Rhea to its popular line of cots. With its sleek, simple and modern lines, Rhea is a new twist on the Robin cot that is suitable for any nursery.

The Rhea combines birch or walnut sides with matte white end panels to create a simple and natural elegance. Like all the cots designed by Oeuf, the Rhea converts to a toddler bed with a conversion kit that is sold separately.

The Rhea cot is manufactured in Europe with solid Baltic birch and birch plywood from sustainably managed forests. The non-toxic, water-based finish and sustainable wood promote a healthy and safe sleeping environment for babies and kids until the age of six. Oeuf recycles all unused wood and uses recycled cardboard to pack its products.

Dimensions : The Rhea cot can be adjusted to 3 different mattress positions and has fixed sides.
L: 144cm D: 76,5 cm et H: 94 cm
Fits a 70 cm x 140 cm mattress

Price: 503.50 Euros (VAT not included). The conversion kit is sold separately for 114 Euros (VAT not included).
